

ENVIRONMENTAL POLICY

JEL Electrical Limited seeks to ensure that this Policy and its associated Environmental Management System (EMS) is clearly understood, and is implemented and maintained throughout all levels of the organisation.

The company is committed to improving the environment by its monitoring of the use and waste of the products purchased and used during the course of its business.

In meeting this commitment we take responsibility for complying fully with the statutory and industry environmental requirements placed upon us and will where possible exceed these requirements. This will be achieved by setting goals through clearly defined objectives and performance standards within the Business Management Systems.

Corporate Environmental Objectives have been agreed by the Directors and are reviewed on an annual basis.

These objectives address: -

- Waste Reduction
- Energy Conservation
- Environmental Friendly Products
- Emissions to Land, Air & Water

These objectives form the basis of the Project Environmental Objectives, Targets & Management Programmes.

ENVIRONMENTAL OBJECTIVES

- 1. Waste Reduction**
 - Identify waste streams and set reduction targets; Reduce, Reuse, Recycle
 - Implement waste management procedure
 - Establish role in waste reduction on Clients sites
- 2. Energy Conservation**
 - Establish monitoring methods at all key offices
 - Set energy reduction targets
- 3. Environmentally Friendly Products**
 - Establish what products we use
 - Seek environmentally friendly alternatives / substitutes
- 4. Emissions to Air, Land and Water**

AIR - Monitor use of company vehicles

LAND - Zero unintentional releases due to lack of containment

WATER - Zero unintentional releases due to lack of containment

Signed

Colin Jervis
